

SURVIVAL GUIDE

The event will take place on two different platforms, **Zoom** and **Discord**.

The Opening Ceremony, the Closing Ceremony and both Workshops will take place on Zoom.

The Opening Ceremony will consist of opening speeches by the organisation, jury and each company. Once the speeches are over, the Networking Session will immediately start. Each company goes to a breakout room and each student will decide which company he wants to know more about.

The Closing Ceremony will start with all the presentations from the teams and a question round by the jury. Once the Jury comes to a conclusion, the winners will be announced.

Each Workshop will be available to every participant. To participate, it's only required to fill a [doodle](#).

The 24 hours of the competition (Case Study and Team Design) will take place on Discord. Each team will be assigned to their room in which they are encouraged to work from. There will be some checkpoints during the competition where the teams show their developments until that point. There will also be several general channels to communicate with the organisers. More rules will be present in the discord server.

Participants are advised to download the two programs, Zoom and Discord, although there are web versions of these programs that can be used on the browser. In addition to downloading the programmes, participants should have an account created on Discord.

All the Zoom links will be available at the official [Schedule](#).
